ADOBE XD   PHOTOPEA   GIT
GITHUB   COMMAND LINE

COURSES

Kimit innovation
Front-end diploma

📅 2021 – 2022   📍 Cairo, Nasr City

- The course started with an introduction to HTML, Next I learned about CSS, which is used for styling and layout of web pages.
- The course also covered JavaScript, which is a programming language used for creating interactive and dynamic user experiences on the web.
- Finally, the course covered React and Next.js, which is a popular JavaScript library for building user interfaces. I learned about React components, state, and props, as well as how to use React and Next.js to create reusable UI elements and manage complex user interactions.
